Examiner Eng:

My first purpose in forwarding this correspondence is to confirm the interview scheduled regarding the above-captioned matter at 2:00 p.m. on Thursday, December 11, 2003. The interview will be attended by both myself and Martin D. Moody, the inventor and applicant.

I am also, in accordance with your request, forwarding a proposed amended Claim 1. This draft of amended Claim 1 is being forwarded for your review and for purposes of discussion at the interview.

We look forward to meeting with you on Thursday, December 11.

Respectfully submitted,

Date December 9, 2003

784.

1. An emergency message processor, in a network having related multiple transmission sources, for providing emergency message initiator information to an emergency system, comprising:

① (a) an information storage unit, associated with the network, maintaining emergency message indicia, ^{ALI & Rentry.} representative of the multiple transmission sources, to be transmitted under emergency circumstances, and destination address ^{ALI database} information to which the indicia is to be transmitted; ^{over address.}

③ (b) an initiator for implementing transmission into the emergency system, with minimal volitional activity, of at least ^{part} ~~some~~ of the emergency message indicia, ^{ALI & ALI} representative of a transmission source implementing transmission under emergency circumstances; and

② (c) means for updating emergency message indicia and providing, from said information storage unit, updated emergency message indicia, representative of a transmission source capable of implementing transmission, to an emergency system database; ~~and~~

① (d) wherein said initiator precludes a need for any adjunct equipment in the emergency system.
